

Retro Computer Museum

with systems ranging from the 1960s onwards!
Please do visit our website for more information.

RCM are proud to be associated with Eurocon and have pleasure in bringing some lovely British machines for you to see and hopefully play on.

We have brought along the following machines (subject to change):

Acorn Atom (home built version), Amstrad CPC664, Memotech MTX512, Sinclair ZX80, Sinclair ZX81, Sinclair ZX-Spectrum (rubber key version), Sinclair ZX-Spectrum +2, Oric Atmos, Dragon 64 and the Jupiter Ace. Please do feel free to have a play and if you need any assistance please do ask.

The aim of RCM is to open a Retro Computer/Console Museum to the public. It will be a hands-on museum where people can play the machines that started the home computer/gaming explosion.

The museum currently has over 200 different systems. We rely on donations of systems from the public. We also sell merchandise and use ticket sales from our Gaming Events and Open Days. This is supplemented by monetary donations from our forum members and/or the general public.

We are currently cataloging every machine, peripheral and games that we have and will be updating the website accordingly. Our next Open Days are October 31st 2010 and a full weekend on 7th and 8th May 2011. Please see our website for further details.

If you want to join our busy forum or feel you can help in any way please do contact us via our website or contact us on +44 (0) 7519 816 283.
